

Correction

Zamponi, Gerald W., Xiaoling Sui, Penelope W. Godding, and Robert J. French. 1993. *Biophys. J.* 65:2324–2334.

The equation

$$t_{\text{open}} = (n + 1)t_{\text{open}}(\text{drug free}) + (n)t_{\text{bf}}$$

in the publication “Dual action of procainamide on BTX-activated sodium channels. Open channel block and prevention of inactivation,” should read

$$t_{\text{open}} = (n + 1)t_{\text{open}}(\text{true}) + (n)t_{\text{bf}}, \quad \text{with} \quad t_{\text{open}}(\text{true}) = \frac{1}{\alpha + \gamma[\text{P}]}.$$

The remaining equations in the paper are based on the correct expression; hence, the analysis of our data is not affected.

We apologize for any inconvenience we might have caused.
